

Roof cable tray I-beam support

Overview

An “H” frame constructed of Unistrut and 8-H Base P bases are used to support ductwork or cable trays on flat roofs. Weight distribution is engineered to 2 PSI. Welded aluminum I-beam ladder cable trays are a core solution and an iconic design in the cable tray industry. The Roof-Pro range of cable management solutions is suitable for supporting the following: For smaller cable volumes, Roof-Pro's TAB-C support utilises a single, broad base that provides effective and non-penetrative support for tray and ladder runs. Installation is simple, with each support. As buildings contain more and more devices and systems requiring structured cabling, the need for sturdy cable tray supports is growing. What can we offer?

Technical designs, advice and. The I-Beam cable tray design is another side rail style offered besides C-Channel side rail styles for customers that prefer this style.
