

Sepam40 Series Relay Protection

Overview

This User's Manual provides detailed information about the Sepam Series 40 family of protection and metering units designed for industrial installations and utility substations.

Key Takeaways

The Sepam 40 is a versatile digital protection relay series designed for current and voltage protection in demanding electrical distribution systems.

Overview

The Sepam Series 40 by Schneider Electric includes 13 types of digital protection relays, each dedicated to a specific application in industrial installations and utility substations. These relays provide reliable protection and control for electrical networks, covering overcurrent, arc, distance, and differential protection for transmission and distribution lines. They are designed for demanding applications requiring precise current and voltage monitoring.

Models and Applications

The Sepam 40 series includes the following models: S40, S41, S42, S50, S51, S52, S53, S54, T40, T42, T50, T52, M41, and G40. Each model is tailored for a specific protection function, such as:

- S4X series: Standard current and voltage protection
- T4X series: Advanced protection with additional functions
- M41 and G40: Specialized applications for metering and grid monitoring

Key Features

Inputs and Outputs: 4 current inputs, 3 voltage inputs, 10 logic inputs, 8 relay outputs, and 16 temperature sensor inputs.

Communication: Modbus communication port and optional TCP/IP interface for integration with SCADA systems.

User Interface: Three types of User-Machine Interface (UMI) for easy operation and monitoring. **Programming:** Logic equation editor and optional Logipam software for custom configuration. **Safety and Reliability:** Conforms to IEC standards, with safety symbols and instructions to prevent electrical hazards.

Optional Modules: Core balance CT, additional communication interfaces, and removable memory cartridges for quick commissioning.

Installation and Operation

The Sepam 40 relays come ready to use with a base unit, connectors, and preloaded application and operating language. They are suitable for industrial and utility networks, providing dependable protection while allowing easy integration into existing systems. The relays are designed for high-performance operation in harsh environments, ensuring long-term reliability.

Additional Information

Warranty: Standard 2-year manufacturer warranty. **Documentation:** User manuals and quick start guides are available for detailed installation, configuration, and safety instructions. The Sepam 40 series is ideal for engineers and operators seeking robust, application-specific protection relays with advanced communication and monitoring capabilities for modern electrical distribution networks.
