

Single-core single-mode gigabit fiber optic transceiver

Overview

This data sheet describes the benefits, specifications, and ordering information for the Cisco SFP Modules for Gigabit Ethernet Applications.

Key Takeaways

Single-mode gigabit SFP transceivers provide high-speed, long-distance fiber connectivity for single-core fiber networks, supporting distances from 10 km up to 180 km depending on the model and wavelength. Overview Single-mode gigabit SFP (Small Form-Factor Pluggable) transceivers are designed for long-distance fiber optic communication using a single-core fiber. They operate at 1 Gbps (Gigabit Ethernet) and are compatible with a wide range of networking devices, including switches, routers, and servers.

These transceivers are hot-pluggable, allowing installation or replacement without powering down network equipment.

Key Specifications

Fiber Type: Single-mode (SMF), optimized for long-distance transmission. Distance Range: Typically from 10 km to 180 km, depending on the specific model and wavelength. Wavelengths: Commonly 1310 nm or 1550 nm, chosen based on distance and fiber characteristics.

Connector Types: LC Duplex or LC Simplex, providing reliable optical connections.
Compatibility: Works with major brands like Cisco, FS, and other standard-compliant devices.
Link Budget Considerations: For shorter distances, inline optical attenuators may be required to prevent receiver overload.

Advantages
Long-Distance Performance: Ideal for connecting equipment across large-scale infrastructures, such as data centers, enterprise networks, and telecom networks.
Flexibility: Can be used in various network applications, including FTTH, corporate networks, and industrial environments.
Reliability: Designed for robust operation with high-quality optical components, ensuring stable data transmission.

Ease of Use: Plug-and-play functionality simplifies network upgrades and expansions.

Applications

Enterprise Networks: Connecting switches and routers across campus or building networks.
Telecommunications: Long-haul fiber links between central offices or data centers.
Industrial Networks: Reliable communication in harsh environments with extended reach requirements.

Data Centers: High-speed interconnects between servers and storage systems.
Summary
Single-core single-mode gigabit SFP transceivers are versatile, long-range, and compatible solutions for high-speed fiber optic networks. They provide reliable connectivity over distances from 10 km to 180 km, support standard LC connectors, and are hot-swappable for minimal downtime.

Their compatibility with major networking devices and robust design makes them suitable for enterprise, telecom, and industrial applications.

FS gigabit ethernet transceiver solutions provide fibre or copper options including 1000BASE-SX, 1000BASE-LX/LH, 1000BASE-T etc., from 100m to 160km, for

Cisco SFP Modules for Gigabit Ethernet Applications

This data sheet describes the benefits, specifications, and ordering information for the Cisco SFP Modules for Gigabit Ethernet Applications.

Gigabit single-mode fiber optic transceiver

Single-fiber refers to a single-core optical fiber, which is transmitted on one core; dual-fiber refers to a dual-core optical fiber, which is transmitted on two cores, one receiving and one sending.

Gigabit single-mode single-core fiber optic module

Optical signals are transmitted directly without repeater amplification. Gigabit single-mode single-core optical fiber modules usually have the following specifications: multi-mode 550m, single

Intellinet Gigabit Fiber SFP Optical Transceiver Module

The Intellinet Network Solutions Gigabit Fiber SFP Optical Transceiver Module (model 545013) is fully hot-pluggable, and that allows you to install the module

Industrial Gigabit Fiber SFP Optical Transceiver

Compatibility in your network is everything, and this industrial SFP Transceiver Module delivers. Use it with any Intellinet SFP equipped network switch or any

Single Mode Single Core SFP Transceiver

Discover single mode single core SFP transceivers with 1.25G speed, SC/LC connectors, up to 80km reach, CE certified, ideal for FTTX and data centers.

Single-Mode Gigabit Fiber Transceiver SFP/Mini-GBIC

THE IT PRO'S CHOICE: Designed and built for IT Professionals, this SFP module is backed for life (lifetime of module, not network switch), including free lifetime 24/5

price-of-nauru-fiber-optic-transceiver-connectors
