

Slovakia CIF Price for 10G SFP Optical Modules

Overview

Here comes the question, which 3rd-party optical transceiver manufacturer is reliable to buy the best priced SFP?

Key Takeaways

The typical CIF price for 10G SFP+ modules in Slovakia ranges from approximately \$20 to \$300 per unit, depending on module type, brand, and transmission distance. Price Overview

10G SFP+ modules vary widely in price based on optical type, reach, and brand. Short-range (SR) modules for multi-mode fiber are generally at the lower end, around \$20-\$60, while long-range (LR/ER) single-mode modules can cost \$100-\$300 or more per unit. Branded OEM modules from Cisco, Juniper, or HPE are typically priced higher due to warranty, support, and vendor lock-in, whereas compatible third-party modules offer cost savings with similar performance.

Factors Affecting CIF Pricing

- **Transmission Distance and Technology:** SR modules (up to 300m) are cheaper, LR modules (10-40 km) cost more due to single-mode optics and higher precision components. CWDM or DWDM modules for specialized applications can further increase costs.
- **Brand and Vendor:** OEM-branded modules carry a premium, while multi-source compatible modules are more affordable.

- Volume and Procurement Channel: Bulk orders reduce per-unit cost. CIF pricing includes shipping and insurance to Slovakia, which may add \$5-\$20 per module depending on logistics and supplier location.

- Module Features: Digital diagnostics (DOM), temperature range, and laser type (EML vs VCSEL) influence pricing .

Example Slovakia-Specific Module

A CWDM 10G SFP+ module with 20 km reach over single-mode fiber is available from Slovak distributors, typically priced in the \$80-\$150 range per unit, excluding shipping and insurance . Adding CIF costs for delivery to Slovakia would bring the total closer to \$90-\$170 per module, depending on supplier and shipping terms.

Practical Guidance

- For data center or enterprise deployment, compatible SR modules are cost-effective for short distances.

- For backbone or long-distance links, LR or CWDM modules are recommended despite higher cost.

- Always confirm supplier CIF terms, including insurance coverage and delivery time, to ensure accurate budgeting. In summary, expect CIF prices for 10G SFP+ modules in Slovakia to range from \$20-\$300, with most standard enterprise modules falling between \$50-\$150 per unit, depending on type, brand, and distance .
