

Specifications of copper wire for cable tray bridging

Overview

Conductor: 7 strands class B compressed bare copper per ASTM B3 and B8 for 14, 12, and 10 AWG cables. Insulation: Polyvinyl Chloride (PVC) with nylon layer. Type TFFN/TFN for 18 and. ed in the National Electric Code. THHN applications are suitable for use in dry locations only at temperatures not to exceed 90°C. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. We recognize the need for a complete cable tray reference source for electrical engineers and designers. Nylon rip-cord is supplied for. Four copper conductors, stranded and insulated with heat and moisture resistant, chemically crosslinked polyethylene (type XHHW-2 or RW90), phase identified and cabled together with fillers (when necessary) and bare copper ground conductor. Cable core is covered with binder tape and overall black.
