

Supply of Explosion-proof Power Distribution Boxes

Overview

Energy Distribution BARTEC offers one of the most extensive ranges of explosion-proof and substance-resistant components, devices, and systems for controll.

Key Takeaways

Explosion-proof power distribution boxes are available from certified suppliers with ATEX and IECEx compliance, suitable for hazardous zones 1, 2, 20, 21, and 22. Key Suppliers and Products BARTEC offers a wide range of explosion-proof and substance-resistant components, including low- and medium-voltage power handling solutions. Their products cover Ex d (flameproof), Ex e (increased safety), Ex i (intrinsically safe), and Ex p (pressurized) enclosures, with options for custom configurations, motor control, and high-current distribution up to 7600A.

Extol International supplies control panels and distribution boards for hazardous areas with ATEX certification. Their products include stainless steel, GRP, and sheet steel enclosures, suitable for indoor (IP42) and outdoor (IP66) applications, with Ex d / Ex'de flameproof designs for Zone 1 (21) and Zone 2 (22) environments. Everest Oilfield provides certified explosion-proof distribution boxes and ATEX transformers from brands like Appleton, ATKON, CZ, and CEAG, ensuring safe and reliable industrial use.

Supermec manufactures ATEX junction boxes and enclosures for chemical, petrochemical, offshore, and refinery applications.

Their EJ

B A, EJB S, CSD, and GUB series are designed for power distribution, monitoring, and signaling in hazardous atmospheres.

Atex-

Supplies offers explosion-proof power distribution panel boxes for explosive gas mixtures (Class IIA, IIB, IIC) and dust mixtures (Zone 20, 21, 22). These are available in aluminum alloy, welded steel, or stainless steel, with wall-mounted or floor-standing installation options, and include overload, short-circuit, and optional leakage protection.

Features and Considerations

Materials: Aluminum alloy, stainless steel, GRP, or welded steel with surface painting or plastic coating. Protection Types: Flameproof (Ex d), increased safety (Ex e), intrinsically safe (Ex i), pressurized (Ex p). Certifications: ATEX, IECEx, and other global standards for hazardous areas.

Applications: Chemical plants, petrochemical facilities, offshore platforms, refineries, and any environment with explosive gases or combustible dust. Installation: Wall-mounted, floor-standing, steel pipe, or cable wiring. Customization: Many suppliers offer customer-specific configurations for control, signaling, and motor management.

These suppliers provide reliable, certified solutions for industrial power distribution in hazardous environments, ensuring safety, compliance, and long-term durability.
