

Vietnam Positive Pressure Explosion-proof Distribution Box

Overview

This manufacturer and trader primarily sells in Guatemala, Vietnam, and the Philippines, and works with Fortune 500 companies.

Key Takeaways

Positive pressure explosion-proof distribution boxes in Vietnam are available from specialized manufacturers, offering high safety standards, modular design, and compliance with international certifications like ATEX and IECEx.

Positive pressure explosion-proof distribution boxes are designed to prevent ignition of flammable gases or dust in hazardous environments by maintaining a pressurized internal chamber that keeps explosive atmospheres out. These boxes are widely used in industries such as petroleum, chemical, coal, metallurgy, shipbuilding, marine, and municipal utilities .

Key Features

- **Construction:** Made from high-quality carbon steel or stainless steel, with high-pressure electrostatic spraying for corrosion resistance, anti-static properties, and durability .
- **Modular Design:** Positive pressure chamber and control chamber can be combined in various configurations (up/down, left/right, front/rear) or installed separately .
- **Safety Systems:** Equipped with gas pressure regulating and filtering devices, spark and particle baffles, and delay mechanisms to ensure combustible gases are fully discharged before powering on .

- Control and Monitoring: Integrated PLC programmable logic controllers, human-machine interfaces with LCD displays, remote monitoring capabilities, and real-time pressure and flow monitoring .

- Customization: Manufacturers offer OEM services, allowing for tailored designs to meet specific industrial requirements .

Certifications and Standards

These distribution boxes typically comply with ATEX, IECEx, and other national and international safety standards, ensuring reliability in explosive atmospheres . Many suppliers also hold national patents and ISO quality certifications, reflecting high manufacturing standards .

Applications in Vietnam

Positive pressure explosion-proof distribution boxes are used in Vietnamese industrial sectors including:

- Oil and gas refineries
- Chemical plants
- Coal-fired power stations
- Shipbuilding and marine operations
- Municipal and firefighting systems
- Food and beverage processing (e.g., wine-making) Suppliers in Vietnam and nearby regions provide sample orders, large-scale customization, and full after-sales support, making it feasible for both small and large industrial projects .

Leading Suppliers

- Tengda Explosion-proof Technology Co., Ltd.: Offers a wide range of explosion-proof distribution boxes, junction boxes, control boxes, and lighting solutions .
- Shanghai Kaiwei Intelligent Technology Co., Ltd.: Provides ATEX and IECEx certified distribution boxes, with exports to Vietnam and Southeast Asia .
- Alibaba-listed manufacturers: Offer positive pressure explosion-proof cabinets with modular design, remote monitoring, and customization options for Vietnamese clients . These suppliers ensure high-quality, reliable, and safe solutions for hazardous industrial environments in Vietnam.
