

Waterproof distribution box for barrier gate

Overview

□IP65 Waterproof□Our circuit breaker protective box shell is made of ABS materials, and is IP65 engineering-grade waterproof.

Key Takeaways

IP65–IP68 waterproof distribution boxes protect barrier gate electronics from water, dust, and UV exposure while supporting clean wiring and DIN rail mounting. Key Features

Ingress Protection: Look for boxes rated IP65 or higher, which ensures protection against dust and water jets, suitable for outdoor barrier gate installations (SinoBreaker, ZCEBOX, EKDB10) . **Material:** Durable ABS or polycarbonate plastics are lightweight, UV-stabilized, and resistant to mechanical impact, while some models offer metal enclosures for added security (EliteGates) . **DIN Rail Compatibility:** Many waterproof boxes include DIN rail mounting options, allowing easy installation of relays, control boards, and terminal blocks for barrier gate systems (SinoBreaker, EKDB10) . **Size and Configuration:** Options range from compact AT series for tight spaces to HT series with extra internal room for multiple terminals or small DIN rail setups. EKDB10 boxes offer 4–39 ways and single, double, or triple layers for flexible wiring layouts . **Environmental Resistance:** UV-stabilized housings and compression gaskets maintain sealing even after repeated openings, ensuring long-term outdoor reliability . **Security and Accessibility:** Hinged doors, locking mechanisms, and gasket seals protect sensitive electronics from tampering while maintaining clean wire routing (EliteGates) .

Applications

- Barrier gates and access control systems: Protects control boards, relays, and power supplies from rain, dust, and UV exposure.
- Industrial and commercial installations: Suitable for pumps, lighting, and solar systems.
- Photovoltaic systems: Multi-layer boxes allow separation of circuits and safe wiring.

Recommendations

- Choose IP65 or higher for outdoor barrier gates.
- Select material based on environmental exposure: polycarbonate for UV resistance, metal for added security.
- Consider internal layout: DIN rail compatibility and sufficient space for terminals and wiring.
- Check for locking and gasket features to prevent tampering and maintain waterproofing.
- Custom sizing is available for complex installations or bulk orders (SinoBreaker, ZCEBOX) . By selecting a waterproof distribution box with these features, you ensure reliable, long-term protection for your barrier gate electronics in outdoor environments.
