

Where can I find cold-joint splices

Overview

Our broad portfolio of electrical joints and splices are made for low, medium and high voltage electrical connections.

Key Takeaways

Cold-joint splices can be purchased from specialized electrical suppliers, manufacturers like TE Connectivity and 3M, and distributors such as Thorne & Derrick or Eland Cables. Manufacturer Direct Purchase

- TE Connectivity offers a wide range of cold shrink cable joints and terminations suitable for medium voltage applications. You can browse their portfolio and purchase select products directly on TE.com, or locate authorized distributors by country for local support and delivery .

- 3M provides cold shrink splices and kits for voltages ranging from 1 kV to 145 kV. Their products are designed for easy installation and reliable performance. You can access product catalogs, technical data sheets, and purchase options through 3M's website .

Authorized Distributors and Suppliers

- Thorne & Derrick distributes 3M cold shrink cable joints for medium and high voltage cables, including 11 kV, 33 kV, and 66 kV. They maintain extensive stock and ship to both UK and international destinations .

- Eland Cables offers cable joint kits for polymeric cables, including cold shrink and heat shrink options. They provide solutions for low and medium voltage applications, with technical support to help select the appropriate joint for your installation .

Key Considerations

- Cold-joint splices are available for various cable types (XLPE, EPR, PVC, PE, LSZH) and configurations (single-core, three-core, armoured, unarmoured).
- When purchasing, consider the voltage rating, cable insulation type, and connector compatibility.
- Many suppliers provide installation guides, videos, and technical support to ensure proper application and safety. By contacting these manufacturers or distributors, you can obtain the right cold-joint splice for your project, either through online ordering or via local authorized suppliers.
